

Amendment

In The Claims:

Please amend claims 36 – 40 and add claim 41, as shown in the complete list of claims below.

- 
1. (Original) A plurality of mounts releasably adhered to a single sheet of a backing material, each mount being a mount for mounting paper to glass, and comprising a body having a first surface carrying an adhesive coating capable of adhering the mount to a sheet of paper to form a mountable arrangement, and a second surface capable of securing such a mountable arrangement directly to glass without adhesive.
 2. (Original) A plurality of mounts according to claim 1, provided in the form of a roll.
 3. (Original) A plurality of mounts according to claim 1, provided in the form of a flat sheet.
 4. (Original) A plurality of mounts according to claim 1, wherein the first and second surfaces of each mount are mutually opposite.
 5. (Original) A plurality of mounts according to claim 1, wherein the first surface of each mount is capable of adhering the mount only to a part of one surface of the sheet of paper to form the mountable arrangement.
 6. (Original) A plurality of mounts according to claim 1, wherein each mount is capable of releasably securing the mountable arrangement directly to glass.
 7. (Original) A plurality of mounts according to claim 1, wherein the first or second surface of each mount is flat.
 8. (Original) A plurality of mounts according to claim 1, wherein each mount is flexible.

- 
9. (Original) A plurality of mounts according to claim 1, wherein each mount is transparent.
 10. (Original) A plurality of mounts according to claim 1, wherein each mount comprises a plastics material.
 11. (Original) A plurality of mounts according to claim 10, wherein each mount further comprises a plasticiser.
 12. (Original) A plurality of mounts according to claim 11, wherein each mount comprises at least 55 parts plasticiser per 100 parts plastics material.
 13. (Original) A plurality of mounts according to claim 10, wherein the plastics material is polyvinyl chloride.
 14. (Original) A plurality of mounts according to claim 1, wherein the thickness of each mount is up to 2mm.
 15. (Original) A plurality of mounts according to claim 14, wherein the second surface area of each mount is in the range 100mm² to 900mm².
 16. (Original) A plurality of mounts according to claim 1, wherein the first or second surface of each mount is square, rectangular, triangular or circular.
 17. (Original) A plurality of mounts according to claim 1, wherein the second surface of each mount is not capable of adhering the mount to paper.
 18. (Original) A plurality of mounts according to claim 1, wherein each mount comprises a pigment material.
 19. (Original) A plurality of mounts according to claim 1, wherein the backing material includes silicone.
 20. (Withdrawn)
 21. (Withdrawn)
 22. (Withdrawn)
 23. (Withdrawn)

24. (Original) A mount for mounting paper to glass, comprising a body having a first surface carrying an adhesive coating capable of adhering the mount only to a part of one surface of a sheet of paper to form a mountable arrangement and a second surface capable of securing such a mountable arrangement directly to glass without adhesive; where the first and second surfaces are mutually opposite.
25. (Original) A mount for mounting paper to glass, comprising a body having a first surface carrying an adhesive coating capable of releasably adhering the mount to a sheet of paper to form a mountable arrangement and a second surface capable of securing such a mountable arrangement directly to glass without adhesive; where the first and second surfaces are mutually opposite.
26. (Original) A mount according to claim 25, wherein the first surface carrying an adhesive coating is capable of adhering the mount only to a part of one surface of a sheet of paper to form a mountable arrangement.
27. (Original) A mount according to claim 25, wherein the first or second surface of the mount is flat.
28. (Original) A mount according to claim 25, wherein the mount is flexible.
29. (Original) A mount according to claim 25, wherein the mount comprises a plastics material.
30. (Original) A mount according to claim 29, wherein the mount further comprises a plasticiser.
31. (Original) A mount according to claim 25, wherein the thickness of the mount is up to 2mm.
32. (Original) A mount according to claim 31, wherein the second surface area of the mount is in the range 100mm² to 900mm².
33. (Original) A mount according to claim 25, wherein the second surface of the mount is not capable of adhering the mount to paper.

34. (Original) A mount according to claim 25, wherein the first surface of the mount is adhered releasably to a backing material.

35. (Original) A mount according to claim 25, wherein the entire surface of the mount is adhered to less than half of the area of a surface of a sheet of paper for permitting the sheet of paper to be mounted to glass.

36. (Currently Amended) ~~Use of a mount~~ A method for securing a first material to a second material, ~~said mount comprising:~~

releasably adhering body having a first surface of a mount to the first material with carrying an adhesive coating carried by the first surface,
wherein the mount and first material capable of releasably adhering the mount to a sheet of paper to form a mountable arrangement; and
securing a second surface of the mount to the second material without adhesive, ~~capable of securing such a mountable arrangement directly to glass without adhesive,~~ where the first and second surfaces are mutually opposite.

37. (Currently Amended) ~~The method~~ Use of a mount according to claim 36, wherein the first material is a paper-based material.

38. (Currently Amended) ~~The method~~ Use of a mount according to claim 36, wherein the second material is a glass-based material.

39. (Currently Amended) ~~The method~~ Use of a mount according to claim 36, wherein the second material has a smooth surface.

40. (Currently Amended) ~~Use of a mount~~ A method for securing a first material to a second material, ~~said mount comprising:~~

adhering body having a first surface of a mount to a part of one surface of a sheet of paper with carrying an adhesive coating carried by the first surface, wherein the mount and the sheet of paper capable of adhering the mount only to a part of one surface of a sheet of paper to form a mountable arrangement; and

securing a second surface of the mount to glass without adhesive, capable of
securing such a mountable arrangement directly to glass without
adhesive, where the first and second surfaces are mutually opposite.

41. (New) A mount arrangement for mounting paper to glass comprising:

a plurality of mounts, each mount comprising a body having a first surface
carrying an adhesive coating capable of adhering the mount to a
sheet of paper to form a mountable arrangement, and a second
surface capable of securing such a mountable arrangement directly
to glass without adhesive; where the first and second surfaces are
mutually opposite.
